Claims

1. A method for promoting bone, periodontium or ligament growth of a mammal comprising applying to said bone, periodontium, or ligament a growth-promoting amount of a composition comprising a partially purified or purified polypeptide growth factor.

- 2. A method for promoting periodontium or ligament growth of a mammal comprising applying to said periodontium, or ligament a growth-promoting amount of a composition comprising a partially purified or purified polypeptide growth factor or a partially purified or purified differentiation factor.
- 3. The method of claim 2, said applying step comprising applying a combination of a said polypeptide growth factor and a said differentiation factor.
- 4. The method of claim 1 or 2 wherein said polypeptide growth factor is chosen from platelet-derived growth factor, insulin-like growth factor I, and insulin-like growth factor II.
- 5. The method of claim 2 wherein said polypeptide growth factor is chosen from transforming growth factor β1, transforming growth factor β2, and transforming growth factor α.
- 6. The method of claim 2 wherein said differentiation factor is chosen from a bone morphogenetic protein and osteogenin.

The method of claim 1 or 2 wherein said Aide growth factor is platelet-derived growth 2 3 The method of claim 3, wherein said 2 polypeptide growth factor is partially purified or 3 purified PDGF and said differentiation factor is partially purified or purified bone morphogenetic 4 5 protein. 9, The method of claim 1 or 2 wherein said 1 periodontal includes bone, cementum, and periodontal 2 3 The method of claim 1 wherein said bone, preriodontium or ligament is damaged by disease, and 2 said method comprises polying to said mammal a 3 disease-healing amount of said growth factor. 1 . a The method of claim 2 wherein said preriodontium or ligament is damaged by disease, and 2 3 said method comprises applying to said mammal a disease-healing amount of said growth factor. 4 W A method for preparing a composition for 1 promoting bone, periodontium or ligament comprising 2 3 mixing partially purified or purified placelet-derived growth factor in a pharmaceutically acceptable carrier 4 5 substance.

13. The method of claim 12, wherein said pharmaceutically acceptable carrier substance is a natural or synthetic polymer.

1

2

1 14. The method of claim 12, wherein said
2 pharmaceutical pacceptable carrier substance is a bone
3 substituting agent.
1 15. The method of claim 12 wherein said

15. The method of claim 12 wherein said pharmaceutically acceptable carrier substance is a viscous liquid or gel.

1 6. The method of claim 8 or 12 wherein said platelet derived growth factor is purified.

1 17. The method of claim 1 wherein said growth 2 factor is purified.

1 0. 18. The method of claim 2 wherein said growth 2 factor or differentiation factor is purified.
